- ☒ Numerical, scientific, and engineering skills
- ☒ Digital and technology-based competences
- ☐ Interpersonal skills

Grade

- ☐ 1 ☒ 2 ☒ 3 ☐ 4

Duration

1 hour

Grouping

- ☐ whole class ☒ group work ☐ partner work ☐ individual work

You need

In the City Blue-Bot mat, Action and Stop-by cards, Blue-Bot, TacTile Reader

Procedure

1. The students (4 to 6) sit around the Blue-Bot mat, the action cards are next to it.
2. The first player takes an action card and reads it aloud.
3. He/ She places the tiles in the TacTile reader to move the Blue-Bot to the correct square.
4. If his/her answer and coding are correct, he/she can keep the card, if not, he will have to put it back into the deck of cards.
5. Students repeat steps 2 to 4 alternately until there are no more cards in the deck.
6. The winner of the game is the one who collects the most cards.

Follow up:

- Use the Stop-by cards to make coding more difficult for your students.
- In step 2, the player takes an action card and a Stop-by card.
- In step 3, he/ she encodes the Blue-Bot to get past the square specified in the Stop by card before reaching the final square.
